

Lifestyle Indices - Degree Days Index - v2

Domain Portfolio: Forecast | Domain: Lifestyle - Indices | Usage Classification: Standard

Geography: Global

Attribution Required: n/a

Attribution Requirements: n/a

Your content licensing agreement with TWC determines the number of days returned in the API response and is constrained by the API Key that is provided to your company.

Overview

The Forecast Indices API is sourced from the TWC Forecast system. The Degree Days index provides the indices for cooling degree days, growing degree days, and heating degree days.

HTTP Headers and Data Lifetime - Caching and Expiration

For details on appropriate header values as well as caching and expiration definitions, please see [The Weather Company Data | API Common Usage Guide](#).

URL Construction

Atomic API URL Examples:	
Degree Days - Daily API	
Request by Geocode (Latitude & Longitude): Required Parameters: geocode , language , format <a href="https://api.weather.com/v2/indices/degreeDays/daily/<duration>?geocode=33.74,-84.39&language=en-US&format=<json>&apiKey=yourApiKey">https://api.weather.com/v2/indices/degreeDays/daily/<duration>?geocode=33.74,-84.39&language=en-US&format=<json>&apiKey=yourApiKey	Aggregate Product Name
https://api.weather.com/v2/indices/degreeDays/daily/3day?geocode=33.74,-84.39&language=en-US&format=json&apiKey=yourApiKey https://api.weather.com/v2/indices/degreeDays/daily/5day?geocode=33.74,-84.39&language=en-US&format=json&apiKey=yourApiKey https://api.weather.com/v2/indices/degreeDays/daily/7day?geocode=33.74,-84.39&language=en-US&format=json&apiKey=yourApiKey https://api.weather.com/v2/indices/degreeDays/daily/10day?geocode=33.74,-84.39&language=en-US&format=json&apiKey=yourApiKey https://api.weather.com/v2/indices/degreeDays/daily/15day?geocode=33.74,-84.39&language=en-US&format=json&apiKey=yourApiKey	v2idxDegreeDaysDaily3 v2idxDegreeDaysDaily5 v2idxDegreeDaysDaily7 v2idxDegreeDaysDaily10 v2idxDegreeDaysDaily15
Request by Postal Code: Required Parameters: postalCode , countryCode , language , format <a href="https://api.weather.com/v2/indices/degreeDays/daily/<duration>?postalCode=94608&countryCode=US&format=<json>&language=en-US&apiKey=yourApiKey">https://api.weather.com/v2/indices/degreeDays/daily/<duration>?postalCode=94608&countryCode=US&format=<json>&language=en-US&apiKey=yourApiKey	Aggregate Product Name
https://api.weather.com/v2/indices/degreeDays/daily/3day?postalCode=94608&countryCode=US&format=json&language=en-US&apiKey=yourApiKey	v2idxDegreeDaysDaily3

Data Elements & Definitions

API Name	Field Name	Description	Type	Range	Sample	Nulls Allowed	Translated	Usage
Repeating Elements: Unique to Forecast								

	fcstValid	Time forecast is valid ... start of the forecast period, always 7am local time.	[epoch]		1369306800	N	N	Display As Provided
	fcstValidLocal	Time forecast is valid ... start of the forecast period, always 7am local time.	[ISO]		2013-05-23T07:00:00-0400	N	N	Display As Provided
Repeating Elements: Common Per Time Segment								
	dow	Forecast valid day of week	[string]		Wednesday	N	Y	Display As Provided
	num	Daily Segment (24hour)- Forecast valid day number. Day 0 = 1st valid day	[integer]		21	N	N	Display As Provided
Atomic Indices								
Cooling Degree Days	cdd	Cooling Degree Day, using based temperature of 65F	[integer]	0-100	2	N	N	Display As Provided
Growing Degree Days	gdd	Growing Degree Day, using base temperature of 50F	[integer]	0-100	5	N	N	Display As Provided
Heating Degree Days	hdd	Heating Degree Day, using based temperature of 65F	[integer]	0-150	17	N	N	Display As Provided
