

The Weather Company - Flu Historical API - v3

Domain Portfolio: Lifestyle | Domain: Health | Usage Classification: Standard

Geography: Continental U.S., Alaska & Hawaii

Attribution Required: Yes

Attribution Requirements: Cite “Source: Centers for Disease Control and Prevention (CDC)”

Overview

The historical flu API provides an estimate of flu activity at the state level, as reported by the CDC. Flu activity data is typically available at the end of every week during flu season (October - May) from the CDC.

Please note - the CDC source report differs depending on the flu season as noted below:

- For the 2019-2020 flu season and all prior seasons, the source report is the State and Territorial Epidemiologists Report, which estimates the level of geographic spread of influenza activity for a state, not the intensity of flu activity.
- Beginning with the 2020-2021 flu season, the source report is the ILI (influenza like illness) Activity Report which reflects the intensity of ILI activity, not necessarily the extent of geographic spread for a state.

HTTP Headers and Data Lifetime - Caching and Expiration

For details on appropriate header values as well as caching and expiration definitions, please see [The Weather Company Data | API Common Usage Guide](#).

Note:

- Data to be used with this API is available from 2013-12-12 16:00 Z to present.

Atomic Endpoints	Aggregate Product Names
v3/wx/flu/historical/1year	v3-wx-flu-historical-1year
v3/wx/flu/historical/1month	v3-wx-flu-historical-1month

URL Construction

Request by Geocode: **Required Parameters:** geocode, language, format, year (1year), yearMonth (1month), apiKey
https://api.weather.com/v3/wx/flu/historical/1month?geocode=<geocode>&language=<language>&format=<format>&yearMonth=<yearMonth>&apiKey=<apiKey>

https://api.weather.com/v3/wx/flu/historical/1month?geocode=33.33,-83.22&language=en-US&format=json&yearMonth=201708&apiKey=yourApiKey

Request by IATA Code: **Required Parameters:** iataCode, language, format, year (1year), yearMonth (1month), apiKey
https://api.weather.com/v3/wx/flu/historical/1month?iataCode=<iataCode>&language=<language>&format=<format>&yearMonth=<yearMonth>&apiKey=<apiKey>

https://api.weather.com/v3/wx/flu/historical/1month?iataCode=LGA&language=en-US&format=json&yearMonth=201708&apiKey=yourApiKey
Request by ICAO Code: Required Parameters: icaoCode, language, format, year (1year), yearMonth (1month), apiKey https://api.weather.com/v3/wx/flu/historical/1month?icaoCode=<icaoCode>&language=<language>&format=<format>&yearMonth=<yearMonth>&apiKey=<apiKey>
https://api.weather.com/v3/wx/flu/historical/1month?icaoCode=KATL&language=en-US&format=json&yearMonth=201708&apiKey=yourApiKey
Request by Place ID: Required Parameters: placeid, language, format, year (1year), yearMonth (1month), apiKey https://api.weather.com/v3/wx/flu/historical/1month?placeid=<placeid>&language=<language>&format=<format>&yearMonth=<yearMonth>&apiKey=<apiKey>
https://api.weather.com/v3/wx/flu/historical/1month?placeid=ee0214ae7fb1d265f3e4d2509e77557119b2cac9d0ac1013b593c74a1567f2b7&language=en-US&format=json&yearMonth=201708&apiKey=yourApiKey
Request by Postal Key: Required Parameters: postalKey, language, format, year (1year), yearMonth (1month) apiKey https://api.weather.com/v3/wx/flu/historical/1month?postalKey=<postalKey>&language=<language>&format=<format>&yearMonth=<yearMonth>&apiKey=<apiKey>
https://api.weather.com/v3/wx/flu/historical/1month?postalKey=30339:US&language=en-US&format=json&yearMonth=201708&apiKey=yourApiKey

Valid Parameter Definitions

Parameter Name	Valid Parameter Value	Description
year	YYYY	Only valid for 1year endpoint The year parameter is used to call specific years - used for API requesting past or historical data requests. The format is “YYYY”.
yearMonth	YYYYMM	Only valid for 1month endpoint The yearMonth parameter is used to call specific months - used for API requesting past or historical data requests. The format is “YYYYMM”.

Data Elements & Definitions

Field Name	Description	Type	Range	Sample	Nulls Allowed
adminDistrictCode	The internationalized State, Region, District or Province identifier code for 'state' or geopolitical area. - level 1 administrative division.	[string]	Any valid state, region, district or province code.	GA	N
fluOutbreakColor	Flu Activity map color.	[string]	White, Green, Yellow, Orange, Blue, Red Color to description mapping. Note that the mapping differs based on which CDC report is being utilized. - White = No Report / N/A - Green = No Activity / Minimal or Insufficient Data - Yellow = Sporadic / Low - Orange = Local activity / Moderate - Blue = Regional / High - Red = Widespread / Very High	Orange	N
fluOutbreakDescription	Narrative description of flu outbreak severity. Note that the descriptions differ based on	[string]	CDC State and Territorial Epidemiologists Report (12/2013 - 05/2020):	No Report	N

	the report date		- No report - No activity - Sporadic - Local activity - Regional - Widespread CDC ILI Activity Report (10/2020 - 05/2021): - Insufficient Data - Minimal - Low - Moderate - High - Very High		
reportTimeLocal	The report date in local apparent time.	[ISO]	ISO 8601 - YYYY-MM-DDTHH:MM:SS-NNNN; NNNN=GMT offset	2014-08-20T10:47:59-05:00	N

JSON Sample

```
// Response Collapsed for Presentation Purposes
{
